

Abstract

Topic:

Problems of organisation of triathlon race at the level of county-championship.

Ambition of the work:

The goal of this work is the creation of the methodical model-manual for potential organiser of a triathlon race, who should be capable to organise an event on similar level after the reading of this paper.

Method:

The data-recall research method was used for the analyse of papers, which deal with this problem. Another information-ressource was our own three-year organisational experience with triathlon-event.

Results:

Complex overview of the whole problem of sport-event-organisation was created. The work describes the organisation of county-championship in triathlon from the first preparations to the final accounting. The manual could be used for organisation of sport event with the similar level and direction.

Keywords:

Triathlon, race organisation, sport event, methodical manual
